PERSONAL PROJECTS

Portfolio Website (10/2022 - 11/2022) [🔗](#)

- one page layout of my projects and work experience, users can learn about me and contact me through my social accounts.
- Employed frontend technology like HTML CSS and React for a responsive user experience
- Uses Email.js for the contact form so users can email me.

Krewesic (12/2021 - 12/2021) [🔗](#)

- Networking application to discover local artists and share content with users.
- Implemented Socket.io for real time live chat messaging and private messaging
- Established an upload feature with Cloudinary Widget and React in the front-end giving artists the ability to post their content of music audio or videos
- Inserted a Switch toggle to trigger the CSS styles globally to change the color scheme

Bike Around and Find Out (10/2021 - 11/2021) [🔗](#)

- Bike trailing application to network with local cyclists.
- Allowed users to upload images with Cloudinary in a React frontend
- Saved a reference to each image's cloud address in a MySQL database using Sequelize
- Created ability for users to post content and comment on other users' posts

Big Easy Casino (09/2021 - 10/2021) [🔗](#)

- Card gaming application to play blackjack and poker.
- Implemented a display of account information for every recent user or players that have logged onto the Big Easy app.
- Allowed users to search for other players, display that searched user information and for users to have the option to follow them.
- Connected client and server side with Axios to request data
